Welcome to 2017

You'll notice a few changes next time you log into your
Indigo Water Group and iSpring training account.

💧 **Every on-line training class is now also approved in a bunch of new states! Check out the map on our website.** We plan to add more states over time.

💧 **We've gained some functionality. You can now view classes on your smart phone, iPad, and other devices**. Each course will be published in both HTML5 and Flash versions in 2016 so they should run on any and all of your devices. Download the iSpring Learn app.

💧 **We keep adding new classes.** In 2017, look for water courses, disinfection byproducts, electrical fundamentals, lock-out tag-out, completing the DMR, and more math classes to become available.

💧 **All of the earlier classes have been moved to their own folders.** These classes are expired and can no longer be viewed for training unit credit *once the updated versions have been posted*. Meanwhile, you can continue to watch the older versions if needed. You'll still be able to access your TU certificates for printing old courses.

💧 **You'll need to click "next" each time you want to move to the next slide.** No more hanging out in the background while the training plays itself. On-line training is easy, inexpensive, and convenient so I don't want to give the State certification boards any reason to doubt that training is taking place.

💧 **Handouts are now attached to each training course.** Click on the "Resources" tab on the top menu bar of any running class. This will allow you to open any of the attachments in a new window so you can follow along. Handouts are also printable and we've kept the handout directory as well so you can preview handouts for classes you haven't purchased yet.

💧 **We've kept some important things the same.** Like price, for instance. On-line training is still the same low cost of only $20 per training unit hour. If you plan to take several courses and want to buy a bundle at a discount, check out our new Learning Paths page or request a custom bundle and we'll make that happen. You can save 20% or more on bundled classes.

We've also got ways to set up on-demand training accounts with reporting ability for supervisors. Check out our FAQs page.
