FREE Water Workshops

(Lunch Not Included)

These one-day (6.5 hour) workshops are designed to be hands-on. Attendees will practice collecting samples for lead and copper, coliforms, residual chlorine, and volatile organic compounds. Everyone will complete a laboratory chain-of-custody form. Each attendee will be able to analyze samples for residual chlorine using a hand-held colorimeter. We'll have a mock chlorine cylinder on hand for demonstrating and practicing proper change-out procedures.

- Math - 60 minutes of unit conversions, volumes, and chemical dosing
- Short videos on proper sampling technique followed by group exercises
- Completing a chain-of-custody
- Chlorine disinfection theory
- Chlorine safety and operations & maintenance
- Chlorine testing with colorimeters
- Hands-on chlorine cylinder changeout

Each hands-on workshop can support up to 25 attendees. If a workshop fills up, operators from small systems will be given preference.
