

Video Transcript:

Welcome to Indigo Water Group – your source for excellent on-line training courses for water professionals.

There are more than 60 on-demand, on-line training classes in Drinking Water Treatment, Water Distribution Systems, Collection Systems, Wastewater Treatment, and Industrial Wastewater Treatment.

Our classes are ready when you are. No more signing up for a webinar or a class that you can no longer attend because of a last minute meeting or an emergency or because you just forgot. It happens to the best of us.

Missed something important? Back up a course and watch it again. The course is yours through the end of the calendar year it was purchased in. Watch it as many times as you like.

Every course includes practice questions to help prepare you for certification exams.

Courses are approved for training units or continuing education credits in multiple states.

You can purchase individual courses if you only need a little or buy a learning bundle for a 20% discount when you need a lot.

Did you know there's an app for that? Learners can download courses directly to their mobile device through the iSpring Learn app and complete courses on the go even when they aren't connected to WiFi.

Our corporate accounts are an easy and convenient way to provide training for groups of five or more in your organization.

We upload attendance results to the CCWP Portal and Ohio EPA Biz websites every morning. If you complete a class today, you'll have your credits within 48 hours.

To get started, create an on-line training account with us by following the link on our main web page at indigowatergroup.com.

From there, it is an easy step to purchase courses from within your online training account or call us at 303-489-9226 to be invoiced directly.
